

Site name: Corliskea/Trien/Cloonfellov Bog SAC 2110

County: Galway/Roscommon

Site Specific Conservation Objective (SSCO) Ecological Attributes

Active raised bogs [7110]

- 1 Habitat Area
- 2 Habitat Distribution
- 3 High Bog Area
- 4.1 Hydrological regime: water levels
- 4.2 Hydrological regime: flow patterns
- 5 Transitional areas between high bog and adjacent mineral soils (incl. cutover areas)
- 6.1 Vegetation quality: central ecotope, active flush, soaks, bog woodland
- 6.2 Vegetation quality: microtopographical features
- 6.3 Vegetation quality: bog moss (Sphagnum) species
- 7.1 Typical ARB species: flora
- 7.2 Typical ARB species: fauna
- 8 Elements of local distinctiveness
- 9 Negative physical indicators
- 10.1 Vegetation composition: native negative indicator species
- 10.2 Vegetation composition: nonnative invasive species
- 11 Air quality: nitrogen deposition
- 12 Water quality

7120 The long-term aim for Degraded raised bogs still capable of natural regeneration is that its peat-forming capability is re-established; therefore, the conservation objective for this habitat is inherently linked to that of Active raised bogs (7110) and a separate conservation objective has not been set in Corliskea/Trien/Cloonfellov Bog SAC.

7150 Depressions on peat substrates of the Rhynchosporion is an integral part of good quality Active raised bogs (7110) and thus a separate conservation objective has not been set for the habitat in Corliskea/Trien/Cloonfellov Bog SAC.

Bog woodland [91D0]

- 1 Habitat area
- 2 Habitat distribution
- 3.1 Vegetation composition: positive indicator species
- 3.2 Vegetation composition: negative indicator species
- 4.1 Woodland structure: cover and height of birch
- 4.2 Woodland structure: dwarf shrub cover
- 4.3 Woodland structure: ling cover
- 4.4 Woodland structure: bryophyte cover
- 4.5 Woodland structure: tree size classes
- 4.6 Woodland structure: senescent and dead wood

Site name: Cortiskea/Trien/Cloonfelloiv Bog SAC 2110
Habitat/Species: Active raised bogs [7110]
(SSCO): To restore the favourable conservation condition of [7110] in SAC 002110
